Dear Sir,

**Re : Testing Of MPC On Rock Melons Grown By Autopot Smart-Valve
Fertigation System**

With reference to above, the results of the trials done in **Pusat Komoditi Serdang "Center of Excellence"** on Golden Langkawi Melon grown in soil less culture in the months of June to early August using your product MPC which is an adjuvant are as follows :

- 1) **Applications** of 10ml of MPC in a 4 gallon knapsack sprayer, were done once a week.
- 2) MPC was sprayed on the leaves as recommend because leaves have bigger surface area.

Observation : The plants which are of 10 days old look like plants which are 14 days old. The plants growth is around 30% faster when MPC is used compared to the plants which were not sprayed with MPC.

- 3) Fruits harvested are bigger and the harvest time is faster. Normally it takes 60 days to harvest the melon, but in this case 53 days. The fastest period in my 5 years of planting melon experience using the Autopot Smart-Valve System.

OBJEKTIF UNGGUL SDN BHD (Co. Reg. No. 655077-P)

* Sole - Distributor of AutoPot Systems

I therefore strongly recommend the use of MPC to all the existing melon growers and the future commercial farms.

I sincerely wish you all the success in promoting your excellent product worldwide.

Thank you,

Your sincerely,
