

1 MusangGrow: Premium Organic Bio-Fertilizer for Durian Cultivation.

MusangGrow

BIO-FERTILIZER

25 kg

Presented By:

AGROW SYNERGY | M | SDN. BHD. (860265 D)

Technology & Innovation in Agriculture

2

Company Overview: • **Established:** 2009 • **Expertise:** Specializes in R&D, manufacturing & distribution of agricultural solutions
• **Differentiators:**  **100% Money Back Guarantee**  **Innovative R&D:** Led by biochemists and agronomists  **Proven Track Record:** 25+ years

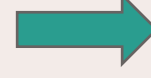

- 3 **Durian Farming Challenges in Malaysia:** 1. **Soil Degradation:** Nutrient depletion from chemicals farming. 2. **Disease Susceptibility:** Phytophthora/Stem canker and root rot. 3. **Yield Volatility:** Climatic stress & inconsistent fruit quality. 4. **Chemical Overreliance:** Rising costs and killing soil biology.

Degradaded Soil

Healthy Durian Roots

Revolutionary Product

Solution: *MusangGrow* addresses these holistically!

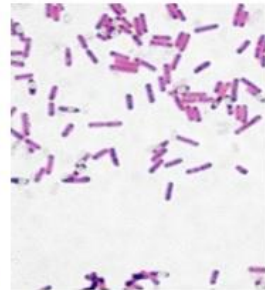

- **Composition:**
 - **Organic Base:** Plant based meals, compost and plant organic acids.
 - **Beneficial Microbes:** *Azotobacter* (N-fixing), *Bacillus subtilis* (P-solubilizing), *mycorrhizal* (nutrient mobilizers).
 - **Durian - Specific Additives:** Enhanced potassium (K) and calcium (Ca) for fruit sweetness and pulp development.
 - **Packaging:** 25 kg/bag

Azotobacter

Citrobacter

Bacillus

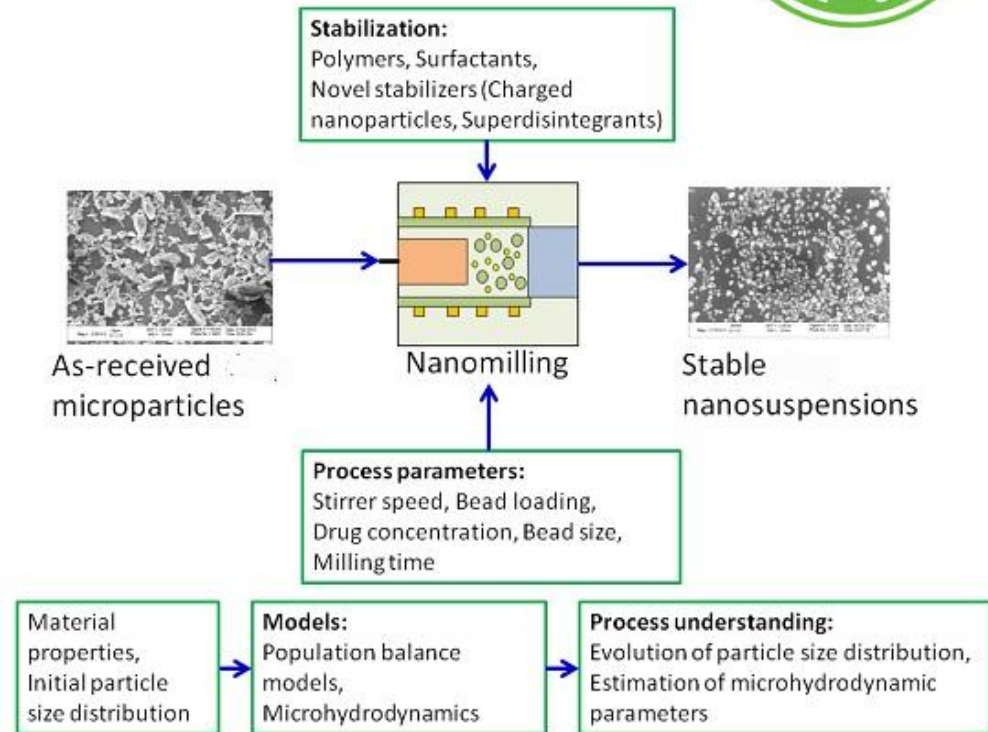

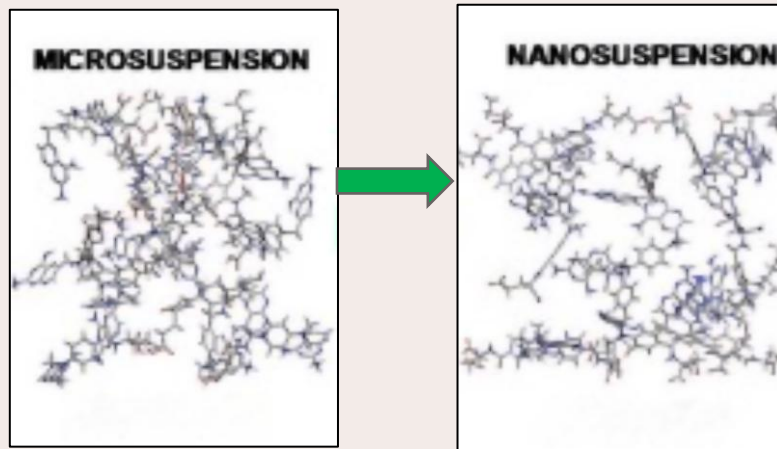

Mycorrhizal

Cutting - Edge Formulation

- **BioDynamic Principles:** Transition to resilient and regenerative agriculture inspired by Rudolph Steiner's theories.
- **Nano-Milling Technology:** Enhances nutrient absorption by 80% vs conventional fertilizers.
- **Microbe Activation:**
 - Increase soil microbes growth and proliferation.

Mycorrhizal

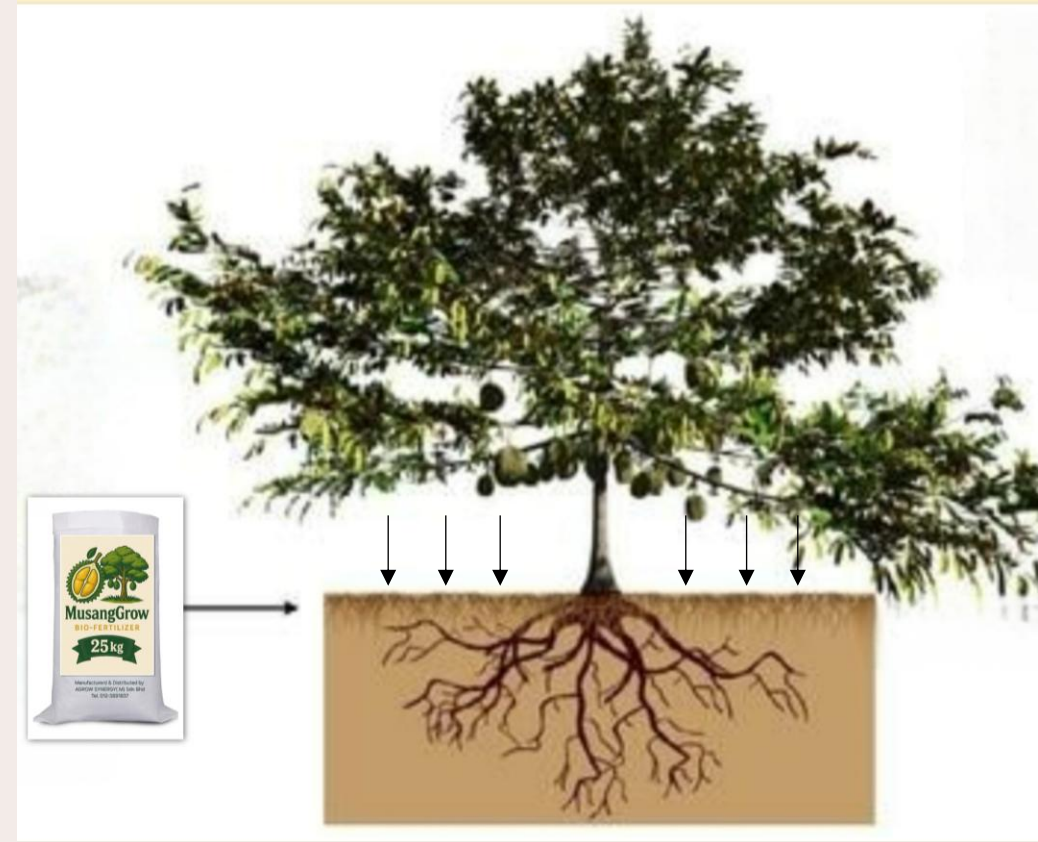

Benefit	Impact on Durian Farming
Yield Increase	+30 – 40% harvest quantity
Size and Taste	+50-70% increase
Disease Resistance	Suppresses leaves and soil borne pathogens.
Soil Health	Improves water retention and microbial diversity.
Eco-Friendly	100% organic, zero chemical residue.
Cost Efficiency	Replaces 30% chemical fertilizers.

- Age of Tree

	Minimum Dosage (kg/tree/year)
1 to 2 years	1 kg
3 to 4 years	2 kg
≥ 5 year	3 kg
- Method
 - Top- Dressing: Apply around root zone and irrigate.

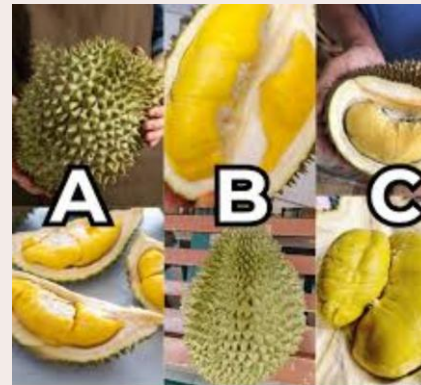

Karak Orchard

Karak Orchard

30-40% higher yield and
50% larger fruit size

Stem Canker Recovery

*Diseased Trunk
Before Application*

*Healed Trunk
After Application*

We are proud to be part of this "World Durian Championship Competition 2018" held on 4th Aug 2018 at Bangi Golf Resort

Planters' D24 durians ranked the best in M'sia

by NUR HAZIQAH A MALEK

D24 durians from Planters' Haven West and East have been ranked as the best D24 durians in the country.

The D24 durians that ranked first and second in the Best D24 at the "World Durian Championship 2018: Malaysia Edition" last weekend were from 99.58ha of an orchard land owned by Sime Darby Property Bhd.

Sime Darby Property GM Mohammad Jalani Mohamad Said said Planters' Haven's D24 durians edged out rivals from across the country.

"We knew our D24 durians were unique when visitors keep reminding us about it."

"We served them at an event recently and people were still talking about the D24 a week after it was over," he said in a statement yesterday.

The awards held at Bangi Golf Resort in Kuala Lumpur was organised as a part of a durian festival in which the fruits were judged on criteria such as presentation, taste, texture, colour, aroma and aftertaste.

Mohamad Jalani said the origin of the D24 durians, Planters' Haven, is a perfect getaway from the city's hustle and bustle.

"We also have rambutan and pulasan fruit trees planted there alongside durians and plan to plant more fruit trees in the future, making this development one-of-a-kind," he said.
